

A person with long blonde hair, wearing a brown and tan plaid jacket, is holding a small dark glass bottle of Viva Oil. The background is a blurred landscape of rolling hills or mountains under a blue sky with light clouds. The text 'viva oil' is prominently displayed in the upper right, with 'viva' in yellow and 'oil' in green, featuring a drop icon above the 'i' in 'viva' and inside the 'o' of 'oil'. Below this, the words 'WHOLESALE BROCHURE' are written in yellow, with a decorative wavy line underneath.

WHAT IS CBN?

Cannabinol (CBN) is affectionately known as the "sleepy cannabinoid". It offers mild sedative benefit, while promoting overall health & wellness.

VivaOil Sleep Formula includes CBD & natural hemp terpenes known to aid sleep. Taken at night before bed, VivaOil Sleep Formula could result in increased total sleep time with less frequent waking and no hangover effects.

CBD OIL FOR PETS

Like humans, dogs & cats have an endocannabinoid system. This means that their bodies are receptive to the compounds derived from hemp. Our pets may see the same relief from pain, inflammation, & anxiety when using CBD oil as humans do. VivaPets Oil offers an alternative for pets!

VivaPets Oil is recommended by pet weight. Based upon guidance provided, simply depress the oil into your furry family members mouth. Relief should follow.

CBD ALMOND BUTTER TREAT

Research shows that oral ingestion (swallowing CBD oil) allows for 6% absorption versus 30% absorption with the sublingual application through mucous membranes in the mouth.

Of course, asking your pet to hold CBD oil under their tongue for 60 seconds is impossible. This is how almond butter helps! The sticky nut butter adheres to the mucous membranes in your pet's mouth, thereby simulating the sublingual method. Much better than a pet immediately swallowing a treat or ingesting oil added to pet food. Plus, pets absolutely love the tasty treat!

VivaOil CO2 Extraction

THE MAYO CLINIC RECOMMENDS
HEMP CO2 EXTRACTION

“

"If patients and/or physicians choose to experiment with CBD... ensure that the product has been extracted by carbon dioxide with no solvents"

VIVA OIL CO2 EXTRACTION SYSTEMS

Quality is our standard. VivaOil is free from residual solvents, pesticides, microbial contaminants & heavy metals. VivaOil's carbon dioxide (CO2) extraction ensures product purity. CO2 gently isolates cannabinoids & terpenes to create a potent, safe, & reliable extract.

What are terpenes? Terpenes lend a unique scent & flavor to all plants. Research shows that hemp terpenes provide a myriad of beneficial health properties. Furthermore, cannabinoids hold a synergistic relationship with terpenes - together they work to provide greater benefit than what any single hemp compound could achieve alone. Terpenes are highly volatile compounds that are easily destroyed with other forms of extraction.
